

Product Features

The SCH series cartridge housings are designed to provide robust and reliable filtration in critical applications. The internal surfaces are mirror polished to <0.4 RA for easy cleaning and the double o-ring code 7 connection ensures a no-bypass seal. Available in a wide range of sizes to suit any application, the SCH series housing is ideal for beverage and pharmaceutical applications, or anywhere sterile filtration is needed.

Advantages

- Simple to maintain with easy cartridge installation
- Constructed of 316L stainless steel
- Internal surfaces are mirror polished to <0.4 RA for easy cleaning
- Available in a wide range of sizes
- Tri-clamp connections
- Silicone gaskets
- Swing bolt or band clamp closure, depending on size

Operating Data

Maximum Operating Temperature: 150 psi @ 284°F (10 bar @ 140°C) for liquid service
